

EU Data Act – No Data Usage Declaration

Product

Manufacturer: Euromac B.V.
Category: Outdoor Heating
Version/Model: Eurom Golden 2000 Amber Smart, models listed below:

Art. Nr.	Item
334104	Eurom Golden 2000 Amber Smart

Introduction

This declaration is provided in accordance with the EU Data Act (Regulation (EU) 2023/2854) and aims to inform end users about data use related to this product.

Product Description

The Eurom Golden 2000 Amber Focus is a heating device that can connect to the Eurom Heating App via a Bluetooth connection. This connection is used solely to operate and control the device locally.

Collection and Processing of Data

When using this product:

- No personal data is collected, stored, or processed.
- No device or usage data is recorded.
- No data is transmitted to external servers, cloud services, third parties, or the manufacturer.
- Communication between the app and the device occurs exclusively via local Bluetooth connection.

Purpose of Data Exchange

No data exchange takes place other than the real-time commands needed to operate the device (e.g., adjusting settings).

These communication elements are used only to perform the requested action and are not stored in any form.

User Rights

Because the product does not store or process any data:

The user does not need to submit requests for access, transfer, or deletion.

There is no data available to be shared with third parties or other services.

Data Security

Bluetooth communication is local and operates under standard security protocols of both the device and the mobile application. No network or internet communication is involved.
